ESSENTIAL REQUIREMENTS

1. Dedicated electrical supply within 1 metre of machine location and easy access to power socket. If using 16/20 amp, preferable termination is a commando socket with isolator switch, ideally under the counter.

2. Dedicated cold water supply terminating within 1 metre of machine location, fitted with easily accessible ¾" BSP washing machine shut-off valve.

3. Waste water pipe with upstand and waste trap located directly beneath machine, below counter.

4. If no plumbed in waste, please ensure you have a suitable container, approx. 10L, to collect waste water – must be emptied daily.

5. Both electrical and plumbing services tested and fully working.

6. 13A three pin socket for grinder installed above counter.

7. Clear space under counter – remove fridge/dishwasher etc. for access to water, waste & power supply.

8. Space also required for water treatment unit approximately 406 x 167mm.

9. A competent person must be available on site to assist with lifting equipment. If none are available, it is at the engineer's discretion to refuse the installation.

10. Sufficient space for 'work area', with a worktop that can support minimum 120kg.

11. Coffee, cups and milk on site for calibration.

We will only install to a pre-prepared site, meeting the above requirements. Failure for this can result in an abortive engineer visit; this is chargeable at £130.00 (ex VAT).

COMPONENTS OVERVIEW

3/4" BSP
"Washing Machine" Valve

1.5" Waste Pipe

16A Commando Socket

13A Plug Socket
